

Carrier Private Marketplace Offers

November 2024

Offers refer to the Open Market (spot board) offers that have been made by the carrier and the offered loads from the broker to the carrier. The spot board offer timing is determined by the user placing the offer or modifying the offer. The loads being offered by the broker are done in 2 business hour increments and can be accepted, declined, or allowed to expire.

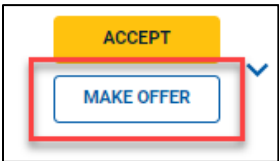

All user roles, except a Driver, can make an offer, can view and action outstanding offers, or modify an existing offer. This is not exclusive to the offers that the specific user made. For example, an Admin can make an offer and that same offer can be modified by a Standard User attached to the same company.
